FRAMEWORK

- REACT

Professional Summary

To gain professional experience as a computer engineer myself I am developing. My interests are mostly computer science, new technologies, and algorithm solving in some languages. The back-end and mostly front-end-based projects have been developed since the school period.

Education

08/2017 - present

Mersin University Computer Engineering

- Bachelor's Degree

Many projects were developed during the school term.

Graduation Projects: A total of 4 projects were developed in the spring and fall semesters of the senior year.

First Project: <https://booking-f8620.firebaseio.com/>

- The project was developed with the React framework. Firebase was used for the validation process.

Second Project: <https://archerdb-4601b.firebaseio.com/>

- A dynamic e-commerce site was developed. Using React and data entry was done using Firebase.

Third Project: <https://oguzz-weather-web-app.netlify.app/>

- A web-based project that brings instant weather conditions according to the city names entered. The project was developed using React and API.

Fourth Project: <https://pssword-generator.netlify.app/>

- A web-based project that creates a random password according to the specified number and the password data to be created and copies it to the clipboard.
